

Berlin Mathematics Research Center

MATH

GRAND OPENING

BERLIN - MAY 14th, 2019

INVITATION

The Berlin Mathematics Research Center MATH+ is designed as a large, comprehensive, and dynamic Cluster of Excellence, home to a vibrant scientific ecosystem, in which mathematics thrives across an entire spectrum ranging from pure abstraction to the solution of problems originating from technology, data, life sciences, sociology, and the humanities. To celebrate the official opening of MATH+, we cordially invite you to spend some entertaining moments with us, to celebrate past successes, and to open the horizon for the challenges of the future.

Prior to the Grand Opening of MATH+, the international conference "The Digital Future" will take place at the same venue that day, to which you are also warmly invited.

Yours sincerely,

Prof. Dr. Martin Skutella
Chair MATH+
